

To Whom It May Concern, In this day and age of gridlocks and traffic jams I cannot believe you are trying to kill a very helpful tool of Satellite radio. I am a satellite radio subscriber and find the traffic and weather extremely helpful. No more waiting between songs or commentary to find the bad areas....no more channel surfing for the most up to date. Whenever something extremely helpful comes along someone always want to stifle. Please reject NAB petition 04-160.

Thank you,
Derick Dallas
